

REALYN LINAS

DEVELOPER / FREELANCER

PROFILE

I am a highly motivated and detail-oriented IT professional with 6 years of experience in software development, system administration, IT support, and hands-on hardware troubleshooting. In addition to full-stack web development, I have practical experience installing, configuring, and maintaining computer hardware, peripherals, and basic networking equipment such as routers, switches, access points, and Piso WiFi systems.

I also have experience working as a Municipal Data Analyst, where I assist in data collection, validation, and analysis for local government programs and development initiatives, including project monitoring for the LGU of Concepcion. My role involves organizing and analyzing municipal data, preparing reports, and supporting data-driven decision-making to improve transparency, monitoring, and service delivery for local government projects.

In addition, I am skilled in UI/UX support using Figma, where I create and refine wireframes, layouts, and prototypes that translate effectively into responsive frontend implementations. I have successfully delivered multiple projects, including a Personnel Management System (PMS), an ICT Borrower's Slip System, and a Livelihood Proposal Management System, demonstrating my ability to manage frontend and backend development, database administration, quality assurance, and system optimization.

I thrive in dynamic environments, enjoy collaborating with cross-functional teams, and am always eager to learn new technologies and implement innovative solutions to solve complex problems while contributing to the digital transformation of organizations and public service systems.

WORK EXPERIENCE

Local Government Unit Concepcion

JANUARY 2026 - PRESENT

Concepcion Iloilo

Municipal Data Analyst/Full-stack Web Developer

A technology professional responsible for managing, analyzing, and transforming municipal data into useful insights while developing and maintaining web-based systems that support local government operations. The role involves collecting and organizing data from various municipal departments, creating reports and dashboards for decision-making, and designing full-stack web applications to automate services, manage records, and improve efficiency in public administration. Skilled in both front-end and back-end development, database management, and data visualization, ensuring secure, scalable, and user-friendly systems that support government transparency and service delivery.

- Collect, clean, and analyze municipal data for reporting and policy planning.
- Develop and maintain web applications for internal government processes.
- Design and manage databases for municipal records and analytics
- Build dashboards and reports for decision-makers and department heads.
- Integrate APIs and automate data workflows between government systems.
- Ensure data security, integrity, and compliance with government standards.
- Collaborate with different municipal departments to digitize processes
- Provide technical support and system improvements for government platforms.

Citadines Hotel, Iloilo City
February 2025

Bureau of Workers with Special Concerns.

Dole Regional Office VI

JANUARY 2025 - DECEMBER 2025

Dela Rama st., Kuang Bldg, Iloilo City

Full-stack Web Developer / IT Service help desk

- A Full-Stack Web Developer at DOLE Regional Office VI (Department of Labor and Employment - Western Visayas) is responsible for designing, developing, and maintaining web applications that enhance the department's digital services and streamline operations. This role involves working on both the front-end (user interface) and back-end (server-side logic, database management) of web applications to support the agency's programs and services.
- Key Responsibilities:
- Develop and maintain web-based systems for employee records, labor compliance monitoring, and public service portals.
- Design responsive and user-friendly interfaces using technologies like HTML, CSS, JavaScript, and frameworks like React or Vue.js.
- Build and manage secure back-end systems using Node.js, Python, PHP, or Java with databases such as MySQL or PostgreSQL.
- Ensure data security and system integrity following government IT compliance standards.
- Collaborate with different DOLE units to automate workflows, enhance reporting, and improve digital service delivery.
- Troubleshoot, debug, and optimize web applications for better performance and accessibility.
- Deploy and maintain web applications on cloud or on-premise servers.

The IT Service Desk provides first-level technical support and assistance to all employees and offices within the organization. This position is responsible for resolving IT-related issues, processing user requests, and maintaining effective communication between end-users and the IT department. The Service Desk ensures the smooth operation of computer systems, networks, and software applications, contributing to the overall efficiency of the organization's IT infrastructure.

- Serve as the first point of contact for users seeking technical assistance via phone, email, or ticketing system.
- Diagnose and resolve hardware, software, network, and system-related issues.
- Log and track all incidents and service requests in the ticketing system until resolution.
- Escalate complex problems to higher-level support or specialized IT personnel when necessary.
- Install, configure, and troubleshoot computer hardware, operating systems, and applications.
- Maintain user accounts, passwords, and access permissions in compliance with security policies.
- Assist in setting up new equipment, such as computers, printers, and network devices.
- Provide basic user training and guidance on standard applications and IT procedures.
- Document common issues, solutions, and procedures for knowledge sharing.
- Participate in IT maintenance, upgrades, and system improvement activities.

SEPTEMBER 2024 - JANUARY 2025

Dungon B. Jaro Iloilo City

Full-stack Web Developer

- Supported end-users with hardware/software issues, ensuring minimal disruption to daily operations.
- Monitored network security, conducted vulnerability assessments, and deployed updates to mitigate risks.
- Collaborated with cross-functional teams to gather requirements and deliver solutions aligned with business objectives.
- Experience managing daily operations, coordinating schedules , and ensuring efficient office workflows.
- Scheduled and coordinated meetings, appointments, and travel arrangements for staff and executives.
- Adept at maintaining confidentiality, handling multitasking, and streamlining administrative processes.
- Managed daily office operations, ensuring a smooth and productive work environment.
- Maintained and updated office records, ensuring accuracy and confidentiality.
- Oversaw office inventory, ordering supplies, and maintaining vendor relationships.
- Assisted in onboarding new employees, managing documentation, and coordinating training schedules.
- Supported event planning and execution for corporate meetings and team-building activities.

Ecoleaf Development Corporation

JANUARY 2024 - OCTOBER 2024

Kalayaan Ave., Cembo Taguig City

Full-stack Web Developer

- Designing and building the user interface (UI): Develop responsive and visually appealing interfaces using technologies like HTML, CSS, and JavaScript frameworks react.
- Cross-browser compatibility: Ensuring that the website works seamlessly across all major browsers and devices.
- Server-side logic: Developing and maintaining the backend architecture using languages such as Node.js, Java, PHP, .NET.
- Database management: Designing and managing databases MySQL.
- API development: Building and integrating APIs GraphQL for frontend-backend communication.
- Authentication and authorization: Implementing secure user authentication and access control using technologies like JWT, OAuth, or session management.
- Server and hosting management: Configuring servers, managing cloud services Azure and ensuring the website or application is deployed and running efficiently.

Pabile App
Taguig, Metro Manila

NOVEMBER 2022 - OCTOBER 2024

ReactNative Developer / Quality AssuranceAnalyst

- Integration Testing: Verify that the React Native components properly integrate with the APIs. This involves testing various scenarios where data is fetched from or sent to the backend.
- Data Validation: Validate the data received from the API against expected formats, types, and values. This includes checking for proper handling of null values, empty responses, and error messages.
- Authentication and Authorization: Test the authentication and authorization mechanisms implemented in the app to ensure that only authorized users can access the API endpoints and perform actions as intended.
- Error Handling: Validate the app's behavior when encountering errors from the API, such as network timeouts, server errors, or validation failures. Ensure that appropriate error messages are displayed to the user and that the app gracefully handles such scenarios.
- Performance Testing: Assess the performance of API call sunder various conditions, including different network speeds and server loads. Check for any latency issues or bottlenecks that could impact the app's responsiveness.
- API Documentation Review: Review the API documentation to ensure that it accurately reflects the endpoints, request/response formats, and authentication requirements. Any inconsistencies or discrepancies should be flagged for clarification.
- Usability Testing: While not directly related to API testing, it's important to consider the overall user experience when interacting with API-driven features. Ensure that the app provides clear feedback and users when interacting with API-dependent functionality.

GoveSmart Solution Inc.,
Iloilo City
Quality AssuranceAnalyst

DECEMBER 2018- MAY 2020

- Develop test plans, test cases, and test scripts based on software requirements.
- Execute manual and automated tests to identify software defects and ensure product quality.
- Collaborate with developers and product manager understand requirements and acceptance criteria.
- Document and track software defects using issue tracking tools.
- Perform regression testing to validate software fixes and updates
- Participate in product design and requirement reviews to provide feedback from a quality perspective.
- Contribute to improving testing processes and methodologies.
